## Guidelines for HW 8?

Are there any guidelines we should follow for Homework 8 (and the future ones which I imagine will be of similar format)? In terms of pages, content, etc.

Thank You!

**the students' answer,** where students collectively construct a single answer[Click to start off the wiki answer](#)**the instructors' answer,** where instructors collectively construct a single answer

There are no page length requirements. However, you should try to follow the case format discussed in Module 17.

**followup discussions** for lingering questions and comments☒ Resolved ☐ Unresolved**Dan Siddall** 4 days ago

Since the problem was analyzed in the lessons, what is the expectation for what we are supposed to submit?  
What was done in the lessons is a great solution what are we supposed to add?

**RITWIK BHATIA** 4 days ago Yeah, the lesson reviewed the case very thoroughly. Would it be acceptable to put that in writing and adjust it appropriately?**Margaret Bolton** 3 days ago Dr. Sokol covers some potential methods and upsides and downsides, but he doesn't specify which data and models should actually be used. You should specify what YOU would do and why. You might also come up with some approach that was not discussed in the lecture videos.

Additionally, recall that Dr. Sokol suggests that you should share your ideas on Piazza and discuss your approaches with your fellow students.
